## Important Information:

**World's Finest Chocolate:** You may Contact/Come by the office to pick up a box of Chocolates to sell. This will be the last week to sell chocolate. All money and chocolate needs to be returned by Friday, October 30, 2020.

**AR Reading Levels and Goals:** Each student has a Reading Level and Goal for the 2<sup>nd</sup> Term. If students reach their goal they will receive bonus points in reading this term.

**Red Ribbon Week:** October 26-30 2020. **Monday:** Wear Red. **Tuesday:** Tie Dye Tuesday. **Wednesday:** Wacky Wednesday (funny clothes/hats). **Thursday:** Team Up Thursday. **Friday:** Costumes—Not scary or gory

**Free School Meals:** All students enrolled in PPSD are able to receive FREE school meals through December 31, 2020, or until funding is exhausted. Contact Central Office for Details.

**Office Hours:** I am available to answer emails, phone calls, and general questions from 7:00 AM to 3:00 PM daily. Please do not hesitate to reach out if you need help.

**Our Classroom Instruction/Webex Times are:** 8:00 AM, 9:20 AM, and 11:30 AM. It is REALLY important for each student to attend our instructional times to fully understand assignments.

**Active Parent:** I will up-date grades weekly. Please check Active Parent to monitor how your child is doing on assignments. 😊

## Science Vocabulary:

### Photosynthesis Vocabulary

1. Photosynthesis – the process where plants use sunlight, water, and carbon dioxide to produce sugar and release oxygen
2. Oxygen – a waste product produced by plants during photosynthesis that animals use for respiration
3. Carbon Dioxide – a gas produced by cells during respiration; used in photosynthesis to produce sugars
4. Glucose – the compound produced through photosynthesis which plants use as food
5. Convert – change from one form to another
6. Fuel – a substance that produces power or energy
7. Organism – any living thing
8. Radiant energy – energy from the sun that reaches Earth as visible light, ultraviolet and infrared (heat) radiation
9. Element – a material that cannot be broken down into anything simpler [example: O (oxygen)]
10. Compound – when two or more elements combine [example: CO<sub>2</sub> (carbon dioxide)]
